

Cold Bonding Kits

Pangofol Rubber Bonding Kits

Pangofol two-part chloroprene cement is recommended for cold bonding most types of rubber to rubber, metal, concrete, fabric and many other materials. CFC-free Pangofol (TCE-free) formula also available. Pangofol kits contain convenient package sizes of adhesive and activator for ease of transport, storage and use.

- PANGKIT – Non-flammable Pangofol QT, Activator 60CC
- PANGKITF – CFC-free Pangofol QT, Activator 60CC

Plastopang PVC and Polyurethane Bonding Kits

Plastopang two-part chloroprene cement is recommended for cold bonding PVC and most polyurethane compounds. Convenience kits contain recommended mixture amounts of Plastopang and Activator for ease of transport, storage and use, saving money and reducing waste.

- PPANGKIT1 – Plastopang 8 OZ, Activator 15CC
- PPANGKIT2 – Plastopang QT, Activator 30CC
